
ATBATS CLINICS SAFETY MEASURES AND RULES

AtBats offers a safe, controlled environment for baseball and softball training that is fully compliant with state COVID-19 safety standards for youth sports activities. Safety and safe distancing are inherent to our operation and facility layout. We have the advantage of physically separating players in training areas and limiting activities and group size to maximize safe distancing at the facility. We have 9600 sq ft of training space and are limiting our occupancy to 30 (well below MA Phase 3, Step 1 requirements), providing 300 sq ft per person. Our high volume fresh air ventilation system has been upgraded and the air quality is very good.

AtBats is offering small group training clinics at our indoor facility this winter. Please review this short list of our clinic safety measures and rules:

- 1) *Clinic sizes range from 4 to 12 participants working with 2-3 coaches depending on focus and format. Clinic training space is ample, with more than 200 square feet per participant.*
- 2) *Clinics operating sequentially in the same training space will be scheduled a few minutes apart to allow time for cleaning and transition between groups. Participants are requested to arrive no sooner than 1-2 minutes before clinic start time.*
- 3) *Participants may be accompanied by one (1) parent or guardian during check-in. The parent/guardian may stay to observe the training but is encouraged to wait in the parking lot or return a few minutes before the clinic end time.*
- 4) *All persons will enter the facility through the front door and exit through the side door. Everyone should remain six feet apart to the greatest extent possible. Signage will be posted on safe distancing and hallway floors will be marked with distance reminders.*
- 5) *All persons must wash their hands immediately after entering the facility. Hand sanitizing stations will be available throughout the facility and signage encouraging hand washing.*
- 6) *Parent/guardian will be provided with a packet of safety information and rules, including daily at-home health and symptoms checks before each session.*
- 7) *Participants must be checked for COVID-19 symptoms at home prior to each clinic session and parent/guardian must provide AtBats staff with a “no symptoms” confirmation prior to clinic sessions.*
- 8) *All persons (participants, parents/guardians, AtBats staff) are required to wear a mask in the facility. Participants may remove their masks briefly during water breaks.*
- 9) *Participants must bring their own equipment (glove, bat, helmet, water bottle) and personal equipment must be labeled with player’s name. Participants will be assigned a personal space for equipment and break periods safely distanced from others.*
